CLOCK STORE, No. 204 Bowery, New-York. —ELIJAH SPERRY, the proprietor of the above establishment, would respectfully inform the public, that he has constantly on hand an extensive assortment of Clocks, suitable for the fronts of Galleries, Counting Rooms, Bars, Parlors, Bedrooms, Kitchens, &c. made of the best materials and finished in superior style, warranted to be accurate time-keepers. Mr. S. has several patterns of Alarm Clocks, the construction of which is said to be the best ever invented. Those who wish to purchase first rate time-keepers, are invited to call at the above number, on the west side of the Bowery, between Spring and Prince streets. a10-3m

ATTENTION!!!—CALL AND TRY KEELER'S beautiful and extra superior SATIN BEAVER HATS. They are composed of the best stock that can be procured in the market, and none but the most skillful and experienced workmen are employed in their manufacture. Their color is warranted a permanent, un fading black, and of the finest lustre. They are also light, yet substantial and durable, owing to their superior workmanship. In producing the newest fashion, as well as the most superior article, he prides himself; and withal, for its excellence. He will sell the cheapest Hat in this city. Call and try, and you will be convinced that the story is only half told. F. KEELER, 102 Division street, corner of Eldridge street. a11-1m

ONE GOOD THING MORE.—\$1 \$3—Elegant Fur and Satin Beaver Hats, at \$3, with a large assortment of Faux Leaf Hats. Also, a new and choice article, drab Satin Beaver Caps for boys. Youths' black Satin Beaver Hats. Remember J. H. MONAGHAN, 224 Bowery, a few doors below Prince street, Chaperon Français. jy23-1m

EVERY MAN'S INTEREST.—A substantial and beautiful HAT for only TWO DOLLARS AND A HALF.—SPOCK & McNEIL, 84 Bowery, offer to the public a substantial and desirable Hat, for the reduced price of two dollars and a half. These Hats, possessing every requisite quality of the best, recommend themselves particularly to the attention of persons who want to wear a good hat always, without incurring heavy expense. Persons buying Hats would do well to call and look at them. jy2-3m

BROWN & CO.'S ONE PRICE HAT STORE. The proprietors having applied their attention to manufacturing HATS OF ONE QUALITY ONLY, now offer to the public an article possessing the requisite qualities of the more costly—lightness, durability and lustre, at the reduced price of THREE DOLLARS; consequently their sales must be for cash, which preclude the necessity of charging the good customer for losses incurred by the bad. The advantages of their improved system of manufacturing, must be obvious to all. Being desirous of arriving at perfection in this branch of their business, they will manufacture and vend this ONE QUALITY EXCLUSIVELY at the above reduced and fixed price. The public are invited to examine their hats and judge of their merits, at BROWN & CO. 178 Chatham street, corner of Mott. Wholesale dealers supplied with fresh stock at short notice. a11-y

ECONOMY IS WEALTH.—CAPS AND FURS.—JOHN D. PHILLIPS & CO., Furriers and Cap Manufacturers, 654 Division street, beg leave to return their sincere thanks to the public for the very liberal patronage they have received, and likewise to inform the public that they have on hand a first rate assortment of Caps and Furs of every description, made of the best materials and workmanship, which they will sell, wholesale or retail, as low as any house in the city. Wholesale Merchants would do well to call and see for themselves, if they wish to save money. Fur altered and repaired, and dyed any color, on reasonable terms. a12-1m

Wanted Immediately.—30 Fur and Cloth Cap Makers and Fancy Fur Sewers, to whom constant employment will be given. THE SUBSCRIBER begs leave to inform his friends and the public in general, that he has taken the Hotel formerly occupied by Col. J. Williams, in the village of Yonkers, near the landing, 17 miles north of the city of New York, where he is prepared to accommodate all parties of pleasure, Target Excursions, both light and heavy artillery. Shooting grounds are very handy, being within three or four hundred yards of the Hotel. The ground selected for the heavy artillery cannot be surpassed. P. S. MR. KELLINGER has taken great care to keep his house very select. Gentlemen wishing to ride in the country with their families, may venture to give Mr. K. a call at his new establishment, without being annoyed with indecent language. The house is not troubled with that portion of the community who are in the habit of abusing themselves and the house. DEWITT C. KELLINGER. a11-1m

BRECKELS' PATENT SOFA AND SETTEE BEDSTEADES, with Spring Seats.—The subscriber has on hand and is continually manufacturing a general assortment, including a number of the very best description of the above articles, all of which he will sell at such prices as will insure the patronage of the public. jyl 6m3m

GOLD.—THOMAS BARNARD, Jr., Gold and Silver Refiner and Exchange Broker, 26 Wall street.—Double gold, Sovereigns, Bank of England Notes, and all kinds of Foreign Gold and Silver bought and sold, Uncurrent Notes Discounted at the lowest rates, and the Mint price given for Bar Gold and Silver. Emigrants and others having Foreign Money to exchange, will find it to their interest to call before going elsewhere. N. B. Gold melted and Assays made in an hour, fine Gold and Silver and Rolled Silver constantly kept for sale Diamonds, Pearls, Colored Stones, &c., bought. j27-3m

CLOCKS.—SMITH'S CLOCK ESTABLISHMENT, corner of the Bowery and Division street, (up stairs), entrance 74 Bowery.—Clocks may be had at this establishment that will keep as good time as any in the world, and at reasonable prices—a variety of patterns, running one, two and eight days. Those in want of a first rate article, will find it to their interest to call. A new article, especially designed for Counting Rooms, Offices and Schools. N. B. Clocks will be repaired and warranted to run well, or the pay refunded. A. B. SMITH. jyl-y

IMPROVED METAL GRIST MILLS.—The public are invited to call at 452 Water street, New York, and see the astonishing effects of the Metallic Grist Mills. These Mills are so portable, that the largest size, capable of grinding ten bushels per hour, will not occupy more space than two square feet, and any man of common capacity can sharpen it and keep it in order with one fourth the cost and labor that is required for a stone mill that will grind as well. All sizes on this plan from a hand mill up to a ten horse power—rights for towns, counties, and states, on reasonable terms. SAM'L G. REYNOLDS. Corn, Oats, Horse Feed, Cut Hay and Straw, in quantities to suit purchasers, by E. D. PAYNE, 452 Water street, opposite the Sorew Dock. jy31-1m

GENTLEMEN'S AND LADIES' WIGS.—G. WADE, No. 47 Wall street, respectfully informs the gentlemen of New York, that he keeps a large assortment of WIGS AND TOUPÉES, of the very best quality. He also flatters himself that from the many years experience he has had in London, and the general satisfaction he has given to those gentlemen that have favored him with their orders, that his Wigs are equal to any in the United States, and he hopes by a strict attention to business, to merit a continuance of their favors. G. W. respectfully informs the ladies, that owing to the size of his store, and the difficulty of obtaining apartments, he has not accommodation for ladies, but shall be happy to wait on them at their residences, on the shortest notice. a19-3w

WOOD'S CARPENTERS' AND MECHANICS' TOOL STORE, corner of Chatham and Chambers street, New York.—T. J. W. has constantly for sale an excellent assortment of the following:—Saws of every description, Stocks and Wits, Augers and Auger Bits, Patent Saw Sets, Callipers and Dividers, Turning and Farmer Chisels and Gouges, Screw Plates, Stocks and Dies, Hammers, Axes, Adzes, Bevels, Gauges, Spirit Levels, Burishers, Spokeshaves, Circular Saws, Turning Lathes, Vices, Measuring Tapes, Drawing Instruments, Wood Boxes for Cutting Screws all sizes, Rules, Files, Drill Rows, Cutting Nippers and Pliers, Mitre Squares, Compasses, Saw Pads, Oil Stones, Draw Knives, Plane Irons, Iron and Steel Squares, Hollow Augers, Drawing Squares, Screw Tools, Shetter's Patent Augers, Cabinet Makers' Clamps, Copper Glue Pots, Blow Pipes, &c. N. B. A large assortment of Planes, manufactured by A. & E. Baldwin, New York. jy24-3m

DOOR PLATES! DOOR PLATES!—The subscriber offers for sale his improved Door Plates, Door Knockers, and Door Numbers, of various patterns, which will be engraved to order in a superior style at short notice and on reasonable terms. ALSO, all the above plated in the best possible manner with double silver plate.

VISITING AND ADDRESS CARDS.—Of every description, engraved and printed, in a superior style, at the shortest notice and on the most reasonable terms. LETTER STAMPS, CONSULAR AND NOTARIAL SEALS engraved to order. CARD CASES.—Ivory carved, Morocco, Tortoise Shell, and other Card Cases.

Ivory and Pearl Paper Cutters, &c. &c. COAT OF ARMS, CRESTS, &c., on stone or metal. Engravers, supplied with Instruments, Copper Coffin Plates and Cards as usual.

STOUT'S DIAMOND TABLET RAZOR STROP, for sale wholesale and retail, by C. WARNER, jy8-3m (Gate Stout & Warner, Card Engraver, 3 Wall.

FOR THE BENEFIT OF THE POOR.—NEW YORK LUNGS AND HEART INFIRMARY, No. 542 Pearl street, near Broadway.—Open on Tuesdays, Thursdays and Saturdays, from 12 to 1 o'clock. Physicians—J. A. Washburn, M. D. and J. H. Borrows, M. D. Consulting Physicians—Gilbert Smith, M. D., Jas. M. Smith, M. D., and Edward DeLafeld, M. D. Consulting Surgeons—Valentine Mott, M. D., Alex. H. Stevens, M. D., J. Kearney Rodgers, M. D. P. S. All Coughs, Colds, or Catarrhs, Influenza, Whooping Cough, Asthma, Spitting of Blood, Consumption, Peripneumony, Pleurisy, Dropsy of the Chest, Palpitation and other affections of the Heart and Lungs, and their appendages, are attended to at the Infirmary. a13-3m

FIRE BRICK AND TILE MANUFACTURES BY F. DEAR, NY, for Furnaces, Kilns, Stoves, Grates, Bakers' Ovens, &c., of the best quality and on the most reasonable terms. A constant supply of the above articles—like-wise Fire Cement and Fire Clay. Reference can be given of their superior excellence to persons who have had them in constant use for several years. Fire Brick and Tile made to order of any size and pattern. jy2-6m2m

STEAM-SCOURING AND TAILORING, by JOHN PERRET, 111 Bowery, between Hester and Grand streets, where he will continue, as usual, to carry on his Clothing and Dressing Establishment, and perform his work in a correct and systematic style. His mode of cleaning and dressing Coats and Pantalones, &c., is by steam-scouring and sponging, the best possible way of cleaning. He respectfully informs his friends and the public, that he extracts all kinds of stains, grease, paint, tar, &c., on a plan different from the usual manner. Also, refits and alters to any size or shape, with new collars, cuffs, buttons, &c., at very reduced prices. He does not desire to boast, but would rather leave his work to show for itself. jy10-2m

EASTERN DYE FOR THE HAIR.—To Gentlemen in general, and the Ladies in particular, the Eastern Dye is beyond doubt, one of the most important inventions ever made by the ancients, as an addition to the toilet, or the art of pleasing. Those who smile a freak of nature hath clothed with red or whose locks have been blacked by care or the frosty hand of time, may now rejoice for the above invaluable preparation, lately discovered in an ancient manuscript, and by its use they may, with very little trouble and no possible danger or inconvenience, give to their hair any shade from a bright auburn to a jet black color, as their fancy may direct. For sale at Dr. P. C. CHABERT'S Store, 322 Broadway, opposite the Hospital, New York. jy12-1f

BILLIARD TABLES.—The first Cast Iron, with an extensive assortment of the patent India Rubber and cloth cushioned Billiard Tables for sale, or to let by the day, hour or gas, at 213 Broadway, City Saloon, rear stairs, third story; or at 603 Broadway, corner of Houston street—thirteen tables in the two Saloons, in full operation every day and evening. Cloths, balls, &c., for sale as usual. N. B. The frames of the Cast Iron Tables are in imitation of six golden eagles, with their wings spread in the attitude of flying; although very heavy, look light enough to raise the tables and fly off with them. jy20-1m

RICE & HOPPINY.—At the City Mills, corner of Jefferson and South streets. Head Rice for family use, Fine Carolina Grist, for Hominy—Coarse do. Corn Flour, for Corn Bread, Ground Rice, or Rice Flour, first quality; also second, Small Rice, a cheap but prime article. Grocers and families supplied with the above, fresh ground, every day, carefully packed for ship use or inland transportation. Directions for cooking furnished. a25 1m

CHEAP TEAS AND GROCERIES.—J. & K. KNOX will sell at their Stores No. 112 Division street, and at 99 Essex street, TEAS of superior quality, and of the latest importations. First rate young hyson at 5s. per lb.; fair do. 4s. per lb.; hyson skin 3s. per lb., and all others equally cheap. N. B. Constantly on hand at each Store, a choice selection of Groceries. a6-1m

MERCHANT TAILOR.—The subscriber takes this method of informing his friends and the public, that he continues at 372 Grand street, next door to the Mechanics and Traders Bank, where he intends to carry on Tailoring, in all its various branches. By strict attention and good workmanship, he solicits a share of public patronage. He has on hand Cloths, Cassimeres and Vestings, of all descriptions, to suit all orders left with him. a20-1m

G. CHRISTMAN, 308 Pearl street, New York, Importer and Manufacturer of Musical Instruments, Music, Strings, &c., at wholesale and retail. a16-3m

SALT WATER BATHS are now open at Castle Garden and at the foot of Harrison street, N. R., from sunrise until 10 o'clock at night. jy30-1f

BEAR'S OIL.—Just received and for sale in pots, at 243 Hudson street. j24-1m

GREAT ASTRONOMICAL DISCOVERIES, LATELY MADE BY SIR JOHN HERSCHEL, L.L.D. F.R.S. &c. At the Cape of Good Hope.

[From Supplement to the Edinburgh Journal of Science.]

[Continued from yesterday's Sun.] "After a short delay in advancing the observatory upon the levers, and in regulating the lens, we found our object and surveyed it. It was a dark narrow lake seventy miles long, bounded on the east, north and west, by red mountains of the same character as those surrounding the Valley of the Unicorn, from which it is distant to the south west about 160 miles. This lake, like that valley, opens to the south upon a plain not more than ten miles wide, which is here encircled by a truly magnificent amphitheatre of the loftiest order of lunar hills. For a semi-circle of six miles these hills are risen, from their brow to their base, as perpendicularly as the outer walls of the Colosseum at Rome; but here exhibiting the sublime altitude of at least two thousand feet, in one smooth unbroken surface. How nature disposed of the huge mass which she thus prodigally carried out, I know not; but certain it is that there are no fragments of it left upon the plain, which is a declivity without a single prominence except a billowy tract of woodland that runs in many a wild variety of breadth and course to the margin of the lake. The tremendous height and expansion of this perpendicular mountain, with its bright crimson front contrasted with the fringe of forest on its brow, and the verdure of the open plain beneath, filled our canvass with a landscape unsurpassed in unique grandeur by any we had beheld. Our twenty-five miles perspective included this remarkable mountain, the plain, a part of the lake, and the last graduated summits of the range of hills by which the latter is nearly surrounded. We ardently wished that all the world could view a scene so strangely grand, and our pulse beat high with the hope of one day exhibiting it to our countrymen in some part of our native land. But we were at length compelled to destroy our picture, as a whole, for the purpose of magnifying its parts for scientific inspection. Our plane was of course immediately covered with the ruby front of this mighty amphitheatre, its tall figures, leaping cascades, and rugged caverns. As its almost interminable sweep was measured off upon the canvas, we frequently saw long lines of some yellow metal, hanging from the crevices of the horizontal strata in wild net work, or straight pendant branches. We of course concluded that this was virgin gold, and we had no assay-master to prove the contrary. On searching the plain, over which we had observed the woods roving in all the shapes of clouds in the sky, we were again delighted with the discovery of animals. The first observed was a quadruped with an amazingly long neck, head like a sheep, bearing two long spiral horns, white as polished ivory, and standing in perpendicular parallel to each other. Its body was like that of the deer, but its fore legs were most disproportionately long, and its tail, which was very bushy and of a snowy whiteness, curled high over its rump, and hung two or three feet by its side. Its colors were bright bay and white in brindled patches, clearly defined, but of no regular form. It was found only in pairs, in spaces between the woods, and we had no opportunity of witnessing its speed or habits.— But a few minutes only elapsed before three specimens of another animal appeared, so well known to us all that we fairly laughed at the recognition of so familiar an acquaintance in so distant a land. They were neither more nor less than three good large sheep, which would not have disgraced the farms of Leicestershire, or the shambles of Leadenhall market. With the utmost scrutiny, we could find no mark of distinction between these and those of our native soil; I have described as common to lunar quadrupeds.— Presently they appeared in great numbers, and on reducing the lenses, we found them in flocks over a great part of the valley. I need not say how desirable we were of finding shepherds to these flocks, and even a man with blue apron and rolled up sleeves, would have been a welcome sight to us, if not to the sheep; but they fed in peace, lords of their own pastures, without either protector or destroyer, in human shape.

"We at length approached the level opening to the lake, where the valley narrows to a mile in width, and displays scenery, on both sides, picturesque and romantic beyond the powers of a prose description. Imagination, borne on the wings of poetry, could alone gather similes to portray the wild sublimity of this landscape, where dark benighted crags stood over the brows of lofty precipices, as if rampart in the sky; and forests seemed suspended in mid air.— On the eastern side there was one soaring crag, crested with trees, which hung over in a curve like three fourths of a gothic arch, and being of a rich crimson color, its effect was most strange upon minds unaccustomed to the association of such grandeur with such beauty. But whilst gazing upon them in a perspective of about half a mile, we were thrilled with astonishment to perceive four successive flocks of large winged creatures, wholly unlike any kind of birds, descend with a slow even motion from the cliffs on the western side, and alight upon the plain. They were first noticed by Dr. Herschel, who exclaimed, "Now, gentlemen, my theories against your proofs, which you have often found a pretty even bet, we have here something worth looking at: I was confident that if ever we found beings in human shape, it would be in this longitude, and that they would be provided by their Creator with some extraordinary powers of locomotion: first exchange for my number D." These lens being soon introduced, gave us a fine half mile distance; and we counted three parties of these creatures; of twelve, nine, and fifteen in each, walking erect towards a small wood near the base of the eastern precipices. Certainly they were like human beings, for their wings had now disappeared, and their attitude in walking was both erect and dignified.— Having observed them at this distance for some minutes we introduced lens, H. z. which brought them to the apparent proximity of eighty yards: the highest clear magnitude we possessed until the latter end of March, when we effected an improvement in the gas-burners. About half of the first party had passed beyond our canvas; but of all the others we had a perfectly distinct and deliberate view. They averaged four feet in height, were covered, except on the face, with short and glossy copper-colored hair, and had wings composed of a thin membrane, without hair, lying snugly upon their backs, from the top of the shoulders to the calves of the legs. The face, which was of a yellowish flesh color, was a slight improve-

ment upon that of the large orang outang being more open and intelligent in its expression, and having a much greater expansion of forehead. The mouth, however, was very prominent though somewhat relieved by a thick beard upon the lower jaw, and by lips far more human than those of any species of the simia genus. In general symmetry of body and limbs they were infinitely superior to the orang outang; so much so, that, but for their long wings, Lieut. Drummond said they would look as well on a parade ground as some of the old cockney militia! The hair on the head was a darker color than that of the body, closely curled, but apparently not woolly, and arranged in two curious semi-circles over the temples of the forehead. Their feet could only be seen as they were alternately lifted in walking; but, from what we could see of them in so transient a view, they appeared thin, and very protuberant at the heel.

"Whilst passing across the canvas, and whenever we afterwards saw them, these creatures were evidently engaged in conversation; their gesticulation, more particularly the varied action of their hands and arms, appeared impassioned and emphatic. We hence inferred that they were rational beings, and although not perhaps of so high an order as others which we discovered the next month on the shores of the Bay of Rainbows, that they were capable of producing works of art and contrivance. The next view we obtained of them was still more favorable. It was on the borders of a little lake, or expanded stream, which we then for the first time perceived running down the valley to the large lake, and having on its eastern margin a small wood. Some of these creatures had crossed this water and were lying like spread eagles on the skirts of the wood. We could then perceive that their wings possessed great expansion and were similar in structure to those of the bat, being a semi-transparent membrane expanded in curvilinear divisions by means of straight radii, united at the back by the dorsal integuments. But what astonished us very much was the circumstance of this membrane being continued, from the shoulders to the legs, united all the way down, though gradually decreasing in width. The wings seemed completely under the command of volition, for those of the creatures whom we saw bathing in the water, spread them instantly to their full width, waved them as ducks do theirs to shake off the water, and then as instantly closed them again in a compact form. Our further observation of the habits of these creatures who were of both sexes, led to results so very remarkable, that I prefer they should be first laid before the public in Dr. Herschel's own work, where I have reason to know they are fully and faithfully stated, however incredulously they may be received.—

"\*\*\*\*\* The three families then almost simultaneously spread their wings, and were lost in the dark confines of the canvass, before we had time to breathe from our paralyzing astonishment. We scientifically denominated them the Vesperilio-homo, or man-bat; and they are doubtless innocent and happy creatures, notwithstanding some of their amusements would but ill comport with our terrestrial notions of decorum. The valley itself we called the Ruby Colosseum, in compliment to its stupendous southern boundary, the six mile sweep of red precipices two thousand feet high. And the night, or rather morning, being far advanced, we postponed our tour to Fetavus, (No. 29,) until another opportunity."

We have, of course, faithfully obeyed Dr. Grant's private injunction to omit those highly curious passages in his correspondence which he wished us to suppress, although we do not clearly perceive the force of the reasons assigned for it. It is true the omitted paragraphs contain facts which would be wholly incredible to readers who do not carefully examine the principles and capacity of the instrument with which these marvellous discoveries have been made; but so will also nearly all of those which he has kindly permitted us to publish; and it was for this reason that we considered the explicit description which we have given of the telescope, so important a preliminary. From these, however, and other prohibited passages, which will be published by Dr. Herschel, with the certificates of the civil and military authorities of the colony, and of several Episcopal, Wesleyan, and other ministers, who, in the month of March last, were permitted, under the stipulation of temporary secrecy to visit the observatory, and become eye-witnesses of the wonders which they were requested to attest, we are confident his forthcoming volumes will be at once the most sublime in science, and the most intense in general interest, that ever issued from the press.

The night of the 14th displayed the moon in her mean libration or full; but the somewhat humid state of the atmosphere being for several hours less favourable to a minute inspection than to a general survey of her surface, they were chiefly devoted to the latter purpose. But shortly after midnight the least veil of mist was dissipated, and the sky being as lucid as on the former evenings, the attention of the astronomers was arrested by the remarkable outlines of the spot marked Gycho No. 13 in Blair's lunar chart; and in this region they added treasures to human knowledge which angels might well desire to win. Many parts of the following extract will remain forever in the chronicles of time:—

[To be continued.] A Family Frozen to Death.—The following account of the awful death of an emigrant family upon the Grand Prairie of India is taken from "A Winter in the Far West":—Having attempted to cross a broad arm of the Prairie, with his family, in an open wagon, on a very cold day, "they were found," says the writer, "stiff in the road, the horses frozen in their traces, and standing upright, as if petrified, and the man leaning against the wagon, with a fragment torn from it in his hands, as if in the act of trying to make a fire. The mother sat erect, with an infant in her arms; but the children were curled about her feet in every position that an attempt to screen themselves from the exposure of the cold would suggest."

A forced Marriage.—Sir William Scott, third laird of Harden, being made prisoner by Sir Gideon Murry, of Elibank, in a bloody border feud, was condemned to lose his head, or to marry Agnes, a daughter of his captor, known by the descriptive appellation of "Muckle-mouthed Meg." To the latter alternative he consented, but not before he had ascended the scaffold; he lived with the lady, however, long and happily, and had by her eight children; from the eldest son springs the present laird of Harden, (who is now claiming before the House of Lords the title of Polwarth,) and from the third lineally descended the late Sir Walter Scott.
